

Youn Hee Pernling Frödin

Data Analyst

New York, New York

I'm an economist and data analyst with an urge to understand and explain the world. I love exploring behaviors and trends, and creating consumer insights. I bring a sense of creativity and curiosity, and I'm always eager to expand my skills.

Experience

Data Science Fellow

Jan 2018 – Present

General Assembly

New York, NY

Data Science Immersive is a 12-week long training program that trains in the latest technologies and to make participants ready for a deep dive into the world of Data Science.

- Developed hard skills in Python, SQL and Git
- Performed data analysis using Pandas, Numpy, Sklearn, Scipy, Statsmodels and more.
- Data visualization with Matplotlib, Seaborn and Tableau.
- Used supervised and unsupervised machine learning techniques in statistical modelling.
- Worked with data management and big data structures such as Hadoop, Spark and AWS.
- Capstone project – The Mood of Music

This project can help new artists that want to enter a new market. It aims to predict music popularity around the world based on the mood of songs, and if the mood of the songs can predict other factors of a country. Methods used: Exploratory analysis, NLP, clustering and classification modelling.
